*DUE DILIGENCE
ON DEMAND*

ENVIRONMENTAL SERVICES

Need Phase I Site Assessment data? With national research coverage and grassroots expertise throughout the Southwest, Banks goes the extra mile to provide in-depth due diligence. Our services include researching current and historical land-use reports, state and federal environmental agency research, aerial photography, mapping services, professional regulatory services and more. For a complete list of services, visit www.banksinfo.com.

FIRSTSEARCH – ASTM DATABASE REPORTS

Tapping into the resources of the Environmental FirstSearch Network, Banks' FirstSearch software creates a database report that quickly and clearly identifies past or present risks associated with a specific property. Maps are included to identify sites by their distance from your property, and a Site Summary Inventory helps you quickly determine risk type while providing ownership/occupancy information on associated real estate. You can order FirstSearch reports online or use the FirstSearch software to run your own searches.

- o Fastest online delivery in the industry
- o Site-specific details, including status of corrective actions
- o In compliance with ASTM and AAI standards
- o Cost-effective

BISMAP – GO-TO SOURCE FOR WELL LOCATION DATA

BISMap is Banks' proprietary GIS service that enables you to search one source for all your oil, gas and groundwater well location data.

Integrating all state and environmental data sources, BISMap generates two downloadable reports that map all wells within a specified area.

- o Oil and gas wells
- o Public water supply wells
- o Privately drilled water wells
- o Irrigation wells
- o Industrial wells
- o Table of wells summary

NATIONWIDE AERIAL PHOTOGRAPHY

Aerial photography can help identify and classify terrain forms, as well as analyze development of land sites. Standard historical aerial packages include research and three decades of aerial photograph coverage.

- o High-quality photos; competitively priced
- o Electronic or hard copy delivery

NATIONWIDE CHAIN OF TITLE SERVICES

Utilizing an unparalleled network of nationwide researchers, Banks can provide a comprehensive Chain of Title report for any site within the United States.

- o Records dating to 1940
- o Current vesting deed provided

NATIONWIDE HISTORIC TOPO MAPS

Banks has access to one of the largest collections of historical maps in the U.S., dating back to the 1800s.

- o 8-1/2" X 11" color images
- o Delivered electronically in PDF format

GIS/PLOTTER SERVICES

Large-format printing is available for any map or aerial photo, with or without overlays, indicating water well locations, oil and gas well locations, and/or ASTM data.

- o Ability to import most point and polygon data
- o Maps up to 42 inches wide
- o Aerial photos, topo maps and street maps available
- o Custom mapping services available for any project

OIL AND GAS SERVICES

Since 1982, Banks has been in the oil and gas research and regulatory consulting business, serving clients ranging in size from Fortune 500 companies to small independent operators. Banks enjoys an exceptional reputation among our clients, regulatory agencies and the oil and gas industry.

OIL AND GAS AGENCY RESEARCH

When you need fast access to agency information, Banks can help. Our staff has more than 75 years of combined experience gathering information for the oil and gas industry.

- o Well records
- o Hearing files
- o Regulatory research

PROFESSIONAL CONSULTING SERVICES

Banks offers professional consulting services on a case-by-case basis to represent clients at state or federal regulatory agencies.

- o Permit applications
- o Hearing representation
- o Field studies
- o Compliance reviews
- o Exhibit preparation

WALKTHROUGH SERVICES

When you need someone on the ground to walk through important documents at state regulatory agencies, Banks can help.

- o Drilling applications
- o Operator change forms
- o Organization setup/renewals

DIVESTITURE SERVICES

Banks Petroleum Inc. (a subsidiary of Banks Information Solutions, Inc.) provides trusted, third-party representation for buying or selling oil and gas properties. Through our proprietary database of 30,000 industry contacts, we market oil and gas interests including working interests and mineral and royalty positions.
